# *Jayro Table Base*

Jayro is a table base that has been purposely designed to automatically stabilise on any surface.

The whole table folds completely flat reducing storage requirements.

Cast aluminium table legs with powder coated finish for extra corrosion protection.

75mm diameter upright column made from high strength aluminium alloy.

All plastic components are structurally engineered strong polymers.

Rubberised feet for extra grip

All other components are made from stainless steel or galvanised.

The folding table bases is a 100% outdoor table base.
